

# Chalk Prints!

## MATERIALS NEEDED

- Chalk
- White Paper
- A Tub
- Scissors
- Water
- Small Cup
- Scissors

**ESTIMATED TIME: 15-20 min**

POSITIVE  
VIBES

## STEPS

1. First get your chalk
2. Using scissors, shave the chalk over your small cup so the chalk dust lands in the cup. (This step will take the longest, ask your parents for help shaving the chalk).
3. Don't mix colors in the cups. Separate each color by cup.
4. Get a sheet of regular copy paper and a plastic tub. (The tub should be big enough to lay the paper in.)
5. Pour the chalk dust onto the water, they should float.
6. Then slowly lay the sheet of paper on the water and gently press the sheet onto the water with your fingertips.
7. Once you're done, just lift your paper up and there should be a nice little marbling effect on the paper.
8. Let it dry and you have your own Chalk Print!
