

Chalk Rockets!

MATERIALS NEEDED

- Water
- Bowl
- Cornstarch
- Film Canister
- Alka Seltzer
- Kool-Aid Powder

ESTIMATED TIME: 5-10 min

STEPS

1. In a small bowl, pour equal parts water and cornstarch.
2. Mix them together real good! You don't want it to be lumpy.
3. Your film canisters should have Kool-Aid powder in it already.
If not pour a bit in there.
4. Fill the film canisters halfway with your mixture. Then mix them together!
5. Grab 1 alka seltzer tablet and break it in half. Break 1 half into 2 pieces.
6. Quickly, put the 2 alka seltzer pieces into the film canister, put the lid on it, flip it over and RUUUUUUUUUUUUUN!
7. Watch your rocket take off from your splash free zone!
